

Our **7** values

In AREVA's Values Charter, they are inseparable from the action principles and rules of conduct that follow them. Our Values Charter applies to all operations under the Group's control, in every country in which they are conducted. The Values Charter is both an affirmation of AREVA's ethical culture and a pledge to respect our partners.

Safety and physical security

The very nature of our businesses demands an acute sense of professionalism. For AREVA this translates into implementation of the highest standards for safety and physical security. It also implies superior know-how as well as constant vigilance in the fields of quality and environmental protection. AREVA fosters team spirit and creates working conditions that are conducive to professional fulfillment.

Integrity

Honesty, integrity and fairness govern all our actions and practices. We comply scrupulously with the laws and regulations of every country in which we operate.

Customer satisfaction

Our growth and sustainability as a group, and thus our ability to meet our commitments to our stakeholders, are conditioned on customer satisfaction. AREVA applies all of its skills and resources to achieving customer satisfaction.

Transparency

Transparency, sincere communications and openness to dialog are hallmarks of our communication programs. Our goal is to provide reliable and pertinent information enabling an objective assessment of our environmental, financial, social and societal performance.

Partnership

AREVA seeks to build frank and constructive relationships with all stakeholders. To meet their needs, we cultivate a spirit of partnership based on mutual responsibility, receptiveness and dialog. Our approach is to become involved in every one of the communities in which we do business. It is based on respect for local customs and on understanding the communities' wishes.

Profitability

We have a duty to achieve and maintain high returns for our shareholders, our employees and all of our stakeholders.

Responsibility

As a major player in the energy market, we have a special responsibility not only to our direct stakeholders, but to the wider public, which will ultimately benefit from our products and services.
